Description

The AMT-A0388 is a Broadband amplifier with low NF in a compact size. The performance is achieved through the use of AMTI's proprietary matching technology and latest in GaAs technology. The amplifier I/Os are Internally matched to 50 Ohms and DC Blocked. The AMT-A0388 is ideal for use as gain stage with low noise for test equipment, Communication systems or where ultra broadband amplification and power are required without adding significant noise in a Hi-Rel communications system for Commercial or Military applications

Applications

- Test Equipment
- Receiver
- EW Systems
- Lab Applications
- Wideband Gain Block
